GOLF COURSE INFORMATION; SAÏDIA

As part of the tourism complex being developed in Saïdia - Morocco, there will be three 18-hole golf courses spread across two sites. The first will be a par 72, 18-hole course (El Palmeral) and the other consists of 36 holes divided in two courses of 18 holes (Las Lagunas and El Oasis).

These golf courses will cater to the widest possible demand, both in terms of player level, and number of players. They provide a total of 208 Ha, divided as follows:

- 78 Ha - El Palmeral Golf Club
- 75 Ha - Las Lagunas course
- 55 Ha - El Oasis course

EL PALMERAL GOLF CLUB

El Palmeral Golf Club will be the most complete course of the three, in terms of difficulty, as it will comprise a variety of wide and narrow holes, with 550 m² greens and a spectacular final hole. It has been designed with a view to host large scale competitions in the future, at both a professional and amateur level. But it has also been designed to provide an enjoyable game for the medium level player.

Its notable features are its landscape surrounded by palm trees (6 different species will be distributed throughout the course) and the large lake in the south zone.

The clubhouse will meet all of the player's necessities. This includes a large practice course of 100 m of tee-line and 270m in length for players of all levels to practice all types of shots. It will have two putting greens with a surface of 1100 m² and 1200 m², plus a pitching area with three greens and two practice bunkers.

LAS LAGUNAS

The Las Lagunas course will present the most difficult of the three with large lakes and narrow paths. It will certainly provide a challenge for those players who wish to demonstrate their level. It will have a unique landscape with its large lakes (20 Ha), palm woodland, olive trees and eucalyptus. Together with El Oasis it will provide a practice course of 135 m wide and 285 m long. As with El Palmeral, it will have a putting green and a pitching area.
